

Cybersecurity Services 2022 RadarView Service provider profile

April 2022

Avasant recognizes 29 top-tier providers supporting enterprise adoption of cybersecurity services

Practice maturity ○ ○ ○

Infosys: RadarView profile

Practice overview

- Practice size: 4,900+
- Certified/trained resources: 1,700+
- Active clients: 230+
- Delivery highlights: Seven security delivery operation centers globally

\$250–\$500M Cybersecurity services revenue, Sept. 2021	30%–40% Cybersecurity services growth, Sept. 2021
--	--

Client case studies

- Infosys secured the IT environment for a US-based beverage manufacturer by leveraging its next-generation security operations. It implemented a multitenant Cyber Watch solution, enabling 24x7x365 security monitoring in-line with the MITRE ATT&CK framework.
- It strengthened cybersecurity posture for cloud infrastructure of a European postal and logistics company. It reduced the organization's threat exposure by implementing SIEM, SOAR, vulnerability management, and threat intelligence solutions.
- It implemented security services with SASE and SOC services for an energy-based company in Europe. It created clientless VPN access for corporate applications and enhanced enterprise-grade security and threat and vulnerability management for hybrid cloud.
- It enhanced IT security posture for an Australian global resources company by leveraging Threat Intelligence Platform (TIP). It performed security event detection and monitoring across over 11k devices and provided insights for threat intelligence and threat hunting.

- Practice maturity ★★★★★
- Partner ecosystem ★★★★★
- Investments & innovation ★★★★★

Key IP and assets

- Infosys Web Crawler Tool 1.0: An automated data security tool
- Infosys Patch Advisory: Unified vulnerability management
- Cyber Watch: A 24x7 incident monitoring and response service
- Infosys Access Manager: A centralized web-based UAM administrator
- Infosys Vulnerability Management Tool: An automation portal for managing vulnerability assessments.

Key partnerships

Platform providers

Software providers

Sample clients

- An Australian global resources company
- A European postal and logistics company
- An energy-based company in Europe
- A Singapore-based telecom operator
- A US-based financial services firm
- A US-based beverage manufacturer

Enhanced Cyber Next platform services with MPDR capability for orchestration benefits. Partners with Cisco, Palo Alto, and Zscaler for SASE services.

Darker color indicates higher industry coverage through digital services ●●●●●

Analyst insights

Practice maturity

- In the past year, Infosys has tripled its client base for its Cyber Next platform, which it had introduced in November 2019. Since then, it has expanded the breadth of the platform by adding services around deception solutions, more than 700 use cases, and playbooks for automated response to tackle new threat vectors that are emerging amid the pandemic.
- It has added an orchestration portal, Cyber Central, that sits on top of various applications offered by the Cyber Next platform, thus providing an integrated view of offerings through fully customizable dashboards.
- Infosys has created a cloud security architecture blueprint by mapping client requirements with Azure security controls. These include vulnerability management through the Azure security center, identity management through Azure AD, MFA, and privileged access management.
- In 2021, it launched breach assessment and advisory services in partnership with Sygnia for rapid recovery from any cyber breach.
- It has introduced a quantitative cyber risk management solution in partnership with Safe Security and helped formulate a risk quantification framework.

Partner ecosystem

- Infosys has developed a strategic partnership with leading secure access service edge (SASE) technology providers, including Zscaler, Palo Alto Networks, and Cisco. It has more than 250 trained professionals for Zscaler and more than 150 professionals for Palo Alto Networks and Cisco SASE solution implementation and operations support. The partnership also includes accelerators and templates for faster value realization.
- In 2021, it formed a global MSP and reseller partnership with Claroty and Forescout to design, architect, assess, and build OT/IoT security services. It has entered a similar partnership with Radware and Cloudflare for web application firewall and distributed denial of service protection.
- It has partnered with Purdue University for cybersecurity training and skills development and aims to train 2,000 employees by the end of 2023.

Investments and innovation

- It plans to accelerate value realization through new service offerings, including SASE and capabilities based on Microsoft enterprise security solutions, among others. It also continues to invest in its Cyber Next platform.
- Through its innovation hubs, it develops platforms with AI/ML-led threat analytics and threat hunting. It also builds solutions around hyper-automated security metric phish meter, user and entity behavior analytics, and advanced forensics.
- It plans to invest in innovation and platform engineering for cloud-centric security information and event management (SIEM) and threat hunting solutions along with investments in cyber defense enhancement and localization of service delivery from the US and Romania.
