# THE INFOSYS PORTAL SOLUTION

Accelerating portal solution development with a pre-built suite of components

What is the Infosys Portal Solution?

Infosys Portal Solution is a set of pre-built use cases developed on top of the Liferay stack, which offers reusable and flexible templates, themes, web analytics integration, and various solution components to accelerate solution development. The Infosys Portal Solution enables Liferay developers to accelerate solution development using production-ready components and reduces time-to-market with high quality deliverables. The Infosys iPortal has a pre-built site, portlets, web content structures, workflows, and pre-integrated collaboration features for quicker time-to-market with increased developer productivity.

Supported Platforms: Liferay 6.2 EE and Liferay 6.2 CE
