

SUSTAINABLE AT YOUR CORE

A progressive journey
to a sustainable next

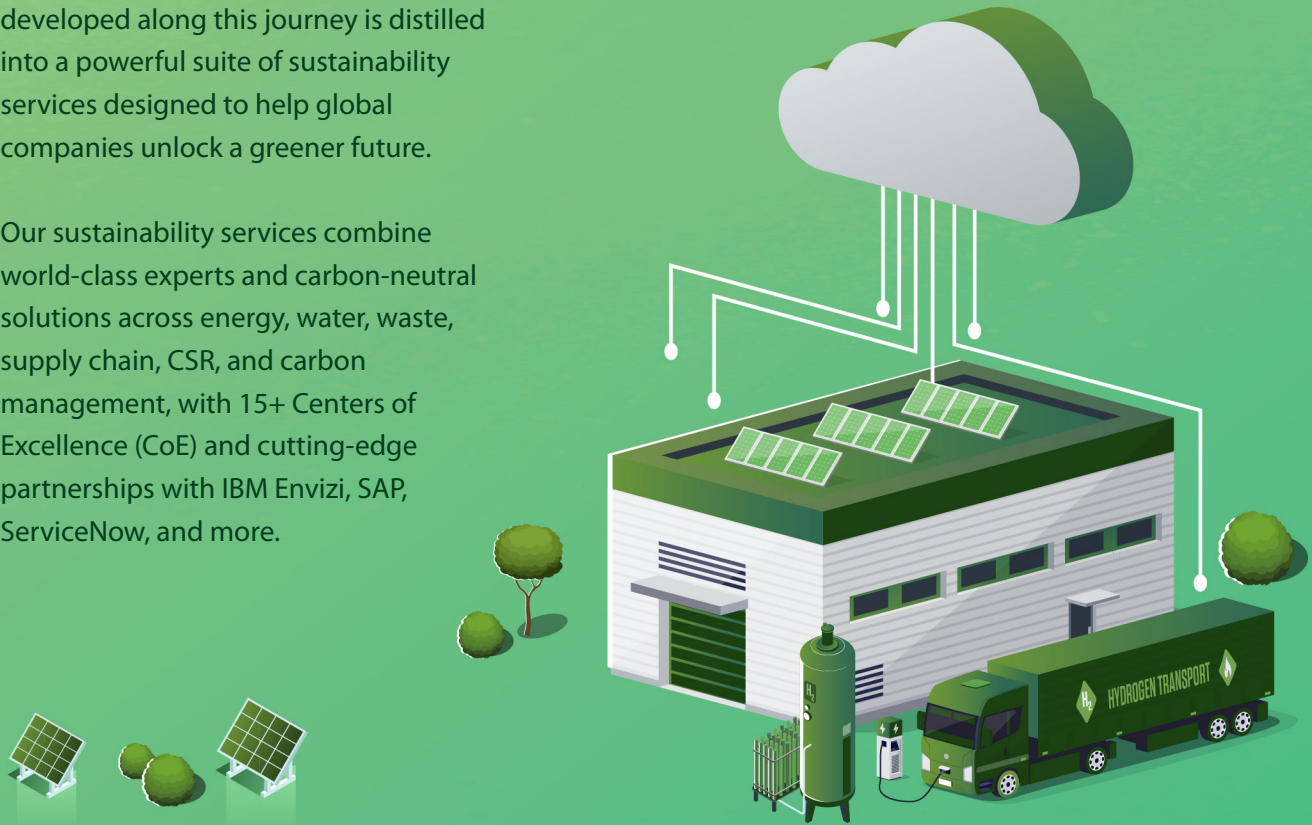

SETTING COURSE TO A SUSTAINABLE FUTURE

For Infosys, sustainability is a way of doing business. This philosophy helped us achieve carbon neutrality in 2020, a full 30 years ahead of the Paris Agreement timeline. Today, the expertise we developed along this journey is distilled into a powerful suite of sustainability services designed to help global companies unlock a greener future.

Our sustainability services combine world-class experts and carbon-neutral solutions across energy, water, waste, supply chain, CSR, and carbon management, with 15+ Centers of Excellence (CoE) and cutting-edge partnerships with IBM Envizi, SAP, ServiceNow, and more.

With over 120 global certifications including GRI, GHG, LEED, and TCFD, Infosys delivers trusted and measurable sustainability outcomes for businesses across the world.

THE INTRICACIES OF ENTERPRISE SUSTAINABILITY

Achieving sustainability requires organizations to balance carbon-neutral goals with operational KPIs while unifying fragmented ESG data and connecting emissions insights from partners across the value chain. Success also depends on aligning diverse roles, with COOs driving efficiency, CSOs strategizing sustainability, CTOs innovating energy use, and procurement officers managing supplier ESG metrics – all while empowering employees to champion initiatives.

At Infosys, we are helping businesses realize these goals by combining our cloud and AI expertise to deliver an intelligent, digital solution designed to embed sustainability into their very core. We call it the **Infosys Sustainability Cloud**.

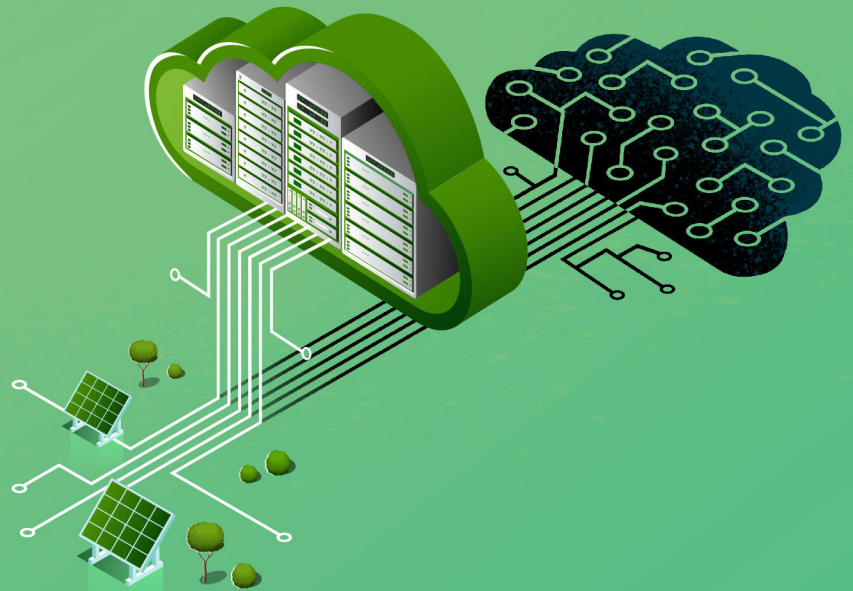

THE INFOSYS SUSTAINABILITY CLOUD, POWERED BY INFOSYS COBALT AND INFOSYS TOPAZ

Infosys Sustainability Cloud brings together an innovative suite of AI-powered, cloud-based solutions designed to help organizations embed sustainability across operations. With advanced analytics, enhanced data transparency, and cutting-edge tools, Infosys Sustainability Cloud empowers businesses to tackle environmental challenges while unlocking new opportunities across three critical dimensions:

ESG Strategy Data and Reporting

Green Value Chains

Sustainable Operations

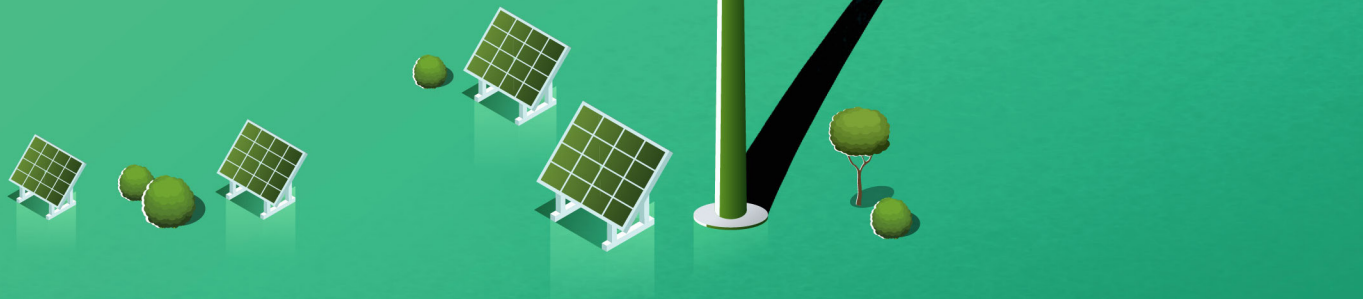

By transforming sustainability into scalable, actionable solutions, we enable organizations to achieve meaningful environmental impact and drive long-term value.

ONE SOLUTION FOR MAXIMUM IMPACT

Infosys' own journey to sustainability inspired and informed the creation of Infosys Sustainability Cloud. Equipped with cutting-edge capabilities and structured to help make the enterprise transition to sustainability as seamless as possible, the Sustainability Cloud delivers high-impact results at scale:

- Developing ESG strategies and reporting frameworks across industries
- Implementing green IT initiatives like green software development and green data centers
- Designing smart and sustainable buildings for sectors like aerospace, real estate, and academia
- Enhancing supply chain sustainability with tools to monitor GHG emissions, lifecycle assessments, and product-level green scoring

ESG STRATEGY DATA AND REPORTING

Infosys Sustainability Cloud equips businesses to simplify ESG processes and achieve auditable sustainability goals. Leveraging AI-powered analytics, it enables ESG data integration, ensures compliance, and delivers actionable insights for better decision-making – helping enterprises align with global standards and drive long-term value with precision and transparency.

Offerings

- ESG Corporate Strategy and Reporting
- ESG Adoption / Digital Skills

SUSTAINABLE OPERATIONS

Infosys Sustainability Cloud enables businesses to improve operational efficiency while minimizing environmental impact. With data-driven capabilities like energy and water management, carbon accounting, and IT circularity, enterprises can optimize resources and accelerate decarbonization across their infrastructure, logistics and practices, weaving responsibility into operations.

Offerings

- Green Buildings and Smart Spaces
- Energy Transition and Decarbonization
- Green IT and Data Centers
- Sustainability Aviation Fuel (SAF) Platform

SUSTAINABILITY POWERED BY GENERATIVE AI

The Infosys Sustainability Cloud leverages Infosys GenAI Suite to deliver greater outcomes, faster. From actionable insights that guide policy and strategy synthesis, to simplifying

decision-making with information contextualization, enterprises can make smarter, more informed strides at scale and with agility.

Enhanced Analysis

Streamline ESG report analysis, document comparison, and regulation compliance assessments, providing deeper insights for informed decision-making.

Expert Guidance

Leverage sustainability subject matter expertise to decode policies and regulations by synthesizing insights from diverse sources like podcasts, videos, and documents.

Actionable ESG Insights

Generate precise ESG review points by addressing predefined questions through an intuitive user interface, delivering contextual and actionable answers.

Competitive Benchmarking

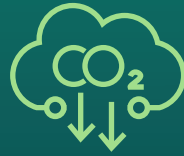

Evaluate peers and competitors to assess ESG maturity, facilitating smarter investment decisions and enhancing overall strategic planning.

PROVEN CAPABILITIES FOR REAL WORLD OUTCOMES

ESG Platform for an Irish Food Wholesaler

Infosys partnered with a leading Irish food wholesaler to streamline ESG data management, ensure EU compliance, and unlock growth opportunities by aligning operations, building a sustainable ESG roadmap, and integrating data across business units.

Carbon Traceability for a Bio-fuel Leader

Infosys designed a cost-effective carbon traceability platform, enabling seamless data integration, compliance, and transparency for a leading ethanol manufacturer, empowering eco-friendly operations and sustainable bio-fuel production across Europe.

Sustainability Platform for a Real Estate Giant

Infosys developed an all-in-one platform for a real estate company, enhancing sustainability reporting, promoting eco-friendly practices, and improving tenant experiences while aligning with global frameworks like DJSI, CDP, and SASB for seamless compliance.

YOUR PARTNER IN SUSTAINABILITY

Infosys' Sustainability Practice comprises 300+ experts and 15+ Centers of Excellence (CoEs) to provide carbon-neutral services that don't add to Scope 3 emissions.

Certified Professionals with Expertise

120+ certifications, including Envizi SAP Ambassador, GRI, GHG, LEED, and more, supported by proven toolkits and frameworks.

Full-stack Sustainability Partner

Comprehensive technology solutions integrated with enterprise data management for end-to-end sustainability strategies.

Rich Ecosystem of Partners

Collaborations with leading technology providers (SAP, Google, IBM), research institutions (MIT, IITs), and NGOs (United Nations, WEF).

Carbon-neutral Enterprise

Over a decade of internal expertise with sustainability initiatives and four years as a carbon-neutral business.

LET'S BUILD A SUSTAINABLE FUTURE TOGETHER
