

Energy Policy

“Infosys as a corporate citizen is committed to demonstrating a high standard of environmental protection, resource conservation, efficient energy management and achievement of our climate change ambitions.

To achieve this, we shall work towards:

- Identification of risks and opportunities associated with Energy Management in our operations
- Sustainable energy usage
- Meeting our entire electricity demands from renewable energy through onsite or off-site sources.
- Implementation of newer, clean, and efficient technologies to achieve energy conservation, improve energy efficiency and improve energy performance.
- Procurement of energy-efficient products and services
- Design for energy performance improvement
- Determination of compliance obligations including applicable legal and other requirements, adherence in all operations, monitoring to ensure fulfilment and correction of non-conformities.
- Continual improvement of energy efficiency and prevention and avoidance of energy waste.
- Energy advocacy.

We will work with all interested parties taking cognizance of their needs and expectations to continually improve our Energy Management System.

We shall meet mandated legal requirements as a minimum and strive to go beyond regulatory limitations to become an innovative leader in Energy Management as well to establish benchmarks.”
